Important safety precautions

This section contains important information on the safe and efficient

operation of your mobile device.

For your safety, please refer to the guideline prior to using the phone.

Note: Failure to comply with the following precautions may be dangerous or illegal.

Drive safely at all times

Do not use a hand-held phone while driving. Park the vehicle first.

Switch off the phone when refueling

Do not use the phone at a refueling point (service station) or near fuels or chemicals.

Switch off in an aircraft

Wireless phones can cause interference. Using them in an aircraft is both illegal and dangerous.

Switch off the phone near all medical equipment

Hospitals or health care facilities may be using equipment that could be sensitive to external radio frequency energy. Follow any regulations or rules in force.

Interference

All wireless phones may be subject to interference, which could affect their performance.

Be aware of special regulations

Meet any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it, or when it may cause interference or danger.

Water resistance

Your phone is not water-resistant. Keep it dry.

Sensible use

Use only in the normal position (held to the ear). Avoid unnecessary

contact with the antenna when the phone is switched on.

Keep your phone away from small children

Keep the phone and all its parts, including accessories, out of the reach of small children.

Accessories and batteries

Use only approved batteries and accessories, such as headsets and PC data cables. Use of any unauthorized accessories could damage you and your phone and may be dangerous.

If jewelry, keys, beaded chains, or other conductive materials touch exposed battery terminals, this could complete an electrical circuit (short circuit), become very hot, and could cause damage or injury. Be careful when handling a charged battery, particularly when placing it inside a pocket, purse, or other container with metal objects.

- ❖ Never use a charger or battery that is damaged in any way.
- ❖ Use the battery only for its intended purpose.
- ❖ If you use the phone near the network's base station, it uses less power. Talk and standby time are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.
- ❖ Battery charging time depends on the remaining battery charge, the type of battery, and the charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When the operation time is noticeably shorter than normal, it is time to buy a new battery.
- ❖ If left unused, a fully charged battery will discharge itself over time.
- ❖ Use only approved batteries, and recharges your battery only approved chargers. Disconnect the charger from the power source when it is not in use. Do not leave the battery connected to a charger for more than a week, since overcharging may shorten its life.

- ❖ Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first.
- ❖ Do not leave the battery in hot or cold places because the capacity and lifetime of the battery will be reduced. Try to keep the battery at room temperature. A phone with a hot or cold battery may not work temporarily, even when the battery is fully charged.
- ❖ Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object like a coin, clip or pen causes a direct connection between the + and – terminals of the battery (metal strips on the battery). For example, do not carry a spare battery in a pocket or bag where the battery may contact metal objects. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting.
- ❖ Dispose of used batteries in accordance with local regulations. Always recycle. Do not dispose of batteries in a fire.
- ❖ To ensure while using the phone please do not get the battery charge.
- ❖ During the course of charging, it is normal to find the battery and the phone slightly heat-up. The Phone will automatically protect itself when battery temperature rises so as to control temperature variation.

Note: This phone is just charged 50%. Please use up the power and recharge it fully. This is the case with the second recharge. After three repetition, the battery can achieve it' s best performance condition.

Operating Environment

Remember to follow any special regulations in force in the area you are in, and always switch off your phone whenever it is forbidden to use it, or

when it may cause interference or danger. When connecting the phone or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

As with other mobile radio transmitting equipment, users are advised that for the satisfactory operation of the equipment and for the safety of personnel, it is recommended that the equipment should only be used in the normal operating position (held to your ear with the antenna pointing over your shoulder).

Extreme heat or cold, Avoid temperatures below -10°C/14°F or above 45°C/113°F

Electronic devices

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone. Consult the manufacturer to discuss alternatives.

Pacemakers

Pacemaker manufacturers recommend that a minimum distance of 15 cm (6 inches) be maintained between a wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research and recommendations of Wireless Technology Research. If you have any reason to suspect that interference is taking place, switch you're your phone immediately.

Hearing aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may wish to consult your hearing aid manufacturer to discuss alternatives.

SIM AT Service

SIM Card provides several value-added services.

These functions will only display and work on the menu of the phone

when your SIM card is supported. The content and the terms of the function lists will depend on your network service provider.

Please contact your network service provider (a network operator or the service provider) in regards with availability of any services related to the SIM card, application information and the costs.

Other medical devices

If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch off your phone in health care facilities when regulations posted in these areas instruct you to do so.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted facilities

Switch off your phone in any facility where posted notices require you to do so.

Potentially explosive environments

Switch off your phone when in any area with a potentially explosive atmosphere, and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Users are advised to switch off the phone while at a refueling point (service station). Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants, or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often but not always clearly marked. They include the areas below decks on boats, chemical

transfer or storage facilities, vehicles using liquefied petroleum gas, such as propane or butane, areas where the air contains chemicals or particles, such as grain, dust or metal powders, and any other area where you would normally be advised to turn off your vehicle engine.

Emergency calls

This phone, like any wireless phone, operates using radio signals, wireless, and landline networks as well as user-programmed functions, which cannot guarantee connection in all conditions. Therefore, you should never rely solely on any wireless phone for essential communications like medical emergencies. To make or receive calls, the phone must be switched on and in a service area with adequate signal strength. Emergency calls may not be possible on all wireless phone networks or when certain network services and/or phone features are in use. Check with local service providers.

To make an emergency call: **(For India example: 112,911,100,101,102)**

1. Key in the emergency number for your present location. Emergency numbers may vary by location.
2. Press the Send Key.
3. Inform your location. Do not end the call until given permission to do so. Certain features like Call Barring may need to be deactivated before you can make an emergency call. Consult this document and your local cellular service provider.

Other important safety information

- ❖ Only qualified personnel should service the phone or install the phone in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty applicable to the device.
- ❖ Check regularly that all wireless phone equipment in your vehicle is mounted and operating properly.
- ❖ Do not store or carry flammable liquids, gases, or explosive materials

in the same compartment as the phone, its parts, or accessories.

- ❖ For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. Improperly installed wireless equipment could result in serious injury if the air bag inflates.
- ❖ Switch off your phone before boarding an aircraft. It is dangerous and illegal to use wireless phones in an aircraft because they can interfere with the operation of the aircraft.
- ❖ Failure to observe these instructions may lead to the suspension or denial of telephone services to the offender, or legal action, or both.

Wynncom Authorized Care Centre

Only qualified service personnel may repair your phone.

It is highly recommended to have a repair service by qualified service personnel. Use only the approved accessories and batteries.

Note: Please use the original components in order to achieve the best use of effects, as the use of non-original components may cause damage to the machinery, in such case company shall not be responsible.

Introduction

1. Phone Display

Key	Function
SIM1 /SIM2 Dial/receive key	Dial and receive calls via SIM1/SIM2 card. View SIM1/SIM2 call history in idle mode.
Call End Key/power on/off key	Pressing and holding to turn the phone on/off. End a call or reject an incoming call. Return to the idle mode.
Left Soft Key	Enter Shortcuts
Right Soft Key	Access the phonebook list in idle mode. Return to the previous menu.
OK Key	Enter the Main menu in idle mode.
*	Press and hold to toggle between *, +, (pause character) P, and (wait character) W. Press to enter symbol when editing text.
#	Press to switch input modes when entering text. Press and hold to activate silent mode/Second time Long press for bring the phone to Vibrator mode/third time Long press Idle mode.
Navigation Key	Press to access four functions in idle mode (Up: Camera Down:Profiles, Left: Write Messages Right: FM Radio Within a menu, press Up, Down, Left or Right to scroll through menu options.

Note: “Press” in this manual, means to press and release the key; “press and hold” means to press and hold the key for at least 3 seconds.

2. Icons & Symbols

The Icon shown on the display may vary depending on your country or service provider. The number 1 and 2 in icons mean SIM1 and SIM2.

6.OUTDOOR MODE	
7.EARPHONE	
8.BLUETOOTH	

Getting Started

Please read the safety instructions in the "Safety Information and Notices" section before use.

1. Inserting the SIM Card and the battery

Remove the back cover

Make sure the phone is switched off. You need to remove the back cover of your phone before you can insert the SIM card. Hold the phone with the front facing downwards lift the cover upwards to remove it.

Remove the battery

Put your finger on the black holder located at the bottom of the battery slot and lift the battery up to remove it. For further clarification please refer the picture below :

Insert the SIM card

Make sure that the clipped corner of the SIM card is facing the correct direction (clipped corner at top left) and the metallic contacts are facing downwards. Slide the SIM card into the card slot until it stops. For further clarification please refer the picture below :

Install the battery

With the metallic contacts of the battery facing the metallic contacts in the battery slot, press the battery down until it locks into place.

2. Inserting a Micro SD (External Memory) Card

Insert the Micro SD card into the micro sd card slot with the metallic pins facing downwards. For further clarification please refer the picture below :

3. Turning the phone on

To turn the phone on, press and hold the Call End key. If you have already enabled the Sim Lock function then enter the PIN code (the 4 to 8 digit code of your SIM card). It is preconfigured and provided to you by your network operator or retailer. If you enter an incorrect PIN code 3 times in succession, your SIM card will be locked. To unlock it, you must obtain the PUK code from your network operator and if you enter an incorrect PUK code 10times in succession ,your need to change the SIM card.

4. Charging the Battery

Ensure the battery is inserted in the handset. To charge the battery, plug in the charger connector at the bottom of your phone (USB interface) and then plug the other end into an AC power socket.

The battery symbol indicates the charging status. While charging, the charge indicators will scroll. When all the scroll bars are steady, the battery is fully charged. It takes about 4 hours to fully charge the battery. Disconnect the charger from the phone.

Disconnect the charger from the AC power socket.

Note: If the battery is powerless, the battery icon will reappear after a few minutes of charging.

5. Important Password

Phone lock password is set as 0000 by default.

6. Keypad Lock and Unlock

Go to Settings > Security > Auto keypad lock to select the time for keypad lock.

In idle mode, if the time expires, the keypad will be locked automatically.

Press the Left Soft Key and then * Key in quick succession to lock/unlock the keypad manually.

7. Transfer files to the Micro SD (External Memory) card

Insert your Micro SD card into a card reader, and then connect the card reader to the USB port of a PC. The PC will auto detect the card reader as a removable disk. You can access the Micro SD card memory now.

Download or upload the files to Micro SD card.

Finally, insert your Micro SD card into your cellular phone, you can view the files in Menu > My File> Memory card.

Text Entry

1. Input Method

Your cellular phone supports several input methods, which include:

Multitap (ABC / abc / Abc)

Numeric (123)

Insert Symbol

Hindi Input

➤ Changing the input modes

During text editing, you can press the # Key to switch input modes,

or press the Left Soft Key [Options] and choose Input method to select different input modes.

Entering Symbols

In any input mode, press the * Key to open the symbols input screen. Use the navigation key to choose the desired symbol and the OK key to select it.

2. Multi taps Input

This method requires multiple key presses to reach the desired character: the letter "h" is the second letter on the 4 key, so you must press 4 twice quickly to enter "h". Using this mode requires you to press a key as many times as needed to enter the desired letter.

Example:

To enter the word "home" in Multitap input mode "abc", press key 4(GHI) twice, press key 6(MNO) thrice, press key 6(MNO) once and key 3(DEF) twice.

3. Numeric Input

Press the # Key to select "123" input option then you can enter the numbers.

Calling

1. Making a Call

In idle mode, enter the phone number. Press the dial key to call the number from SIM1 and SIM2. Press the Call End Key to end the call.

Note: During a call, press the navigation up and down key to adjust the volume. You can press the Left Soft Key [Options] to choose Sound Recorder to record.

In most countries, recording telephone conversations is subject to legislation. We advise you to notify the caller if you intend to record your conversation and only do so if they agree.

Making an International Call

1. Press the * Key twice quickly to enter "+".
2. Enter the country code.
3. Enter the area code (normally without the 0 before it) followed by the phone number.
4. Press the Dial Key to call directly.

2. Answering a Call

Press the call receive key/Dial Key to answer calls. Press the Call End key to reject it.

Overview of menu functions

To access Menu mode, press [**Menu**] in Idle mode.

* Some menus are operator-, network- and subscription-dependent

How to Use

Select Menu

Press the Left Soft Key [Menu] to enter main menu in idle mode.

Press the Navigation Key to choose desired operation and press the Left Soft Key [Ok] to enter the selected operation.

You can exit a menu and return to idle mode by pressing the Right Soft Key [Back] or the Call End Key.

Main Menu

Messages	Phonebook	Call history
Settings	Y Zone	Multimedia
Profiles	File manager	Organizer
Music	Services	King movie

For Further Clarification, please refer to the main menu picture given below:

1. Messages

1.1 Create new

1.1.1 Create new SMS

To write a SMS enter the create SMS. User can perform the below operations on the message created:

Add recipient: Add from phonebook or direct input the contact number.

Save to draft: Save the message to draft.

Insert: Insert the picture / audio / video /text template / vCard / vCalendar in the message.

Convert to MMS: Convert SMS to MMS.

Send options: SIM1 / SIM2.

Input menu: Insert symbol / copy / input method / smart input / language.

Attention: Partial urban and the local short message center does not support is bigger than 160 English characters the length information.

1.1.2 Create new MMS

The MMS stands for the multimedia short note services, its biggest characteristic supports the multimedia functions, can transmit the text, the image, the sound, the video and so on.

The MMS service needs the network operator to support, before the use, please confirm that your SIM card supports this service or the consultation related network operator.

Your handset support MMS function, carries on the essential MMS establishment after it, may receive and send the multimedia information.

Access submenus of "Write MMS", there are several items: To, Cc, Bcc, subject and edit content etc. When you edit, you can replace, delete, insert picture, audio, video, template, vcard, and vcalendar etc.

After finished editing, user can choose "send", "Add recipient", "Insert" etc.

1.2 SMS/MMS

1.2.1 Inbox

You can store the SMS. The icons before the message list means whether this message is SMS and which is stored in SIM1, SIM2 or the phone.

Choose one SMS and press left soft key, then you will do several operations, for example, reply the SMS, delete, Call, Lock and mark. Press OK key directly you can read this SMS.

Open: examines the message

When examines the message, press "Option", enter to the message's option. If the received message contains the website or the number, you may press the buttons to select the website and preservation.

New message: SMS or MMS.

Reply: may reply the current message by SMS/MMS.

Delete: delete the message.

Copy to SIM /phone: copy the message to SIM card or to phone.

Export SMS : export the message to phone or memory card.

Mark: after marking successfully, may delete all selected SMS/MMS and export the marked SMS.

SMS search: you can input text to find the SMS

View details: the information of the message (Type/Date/Time/From)

1.2.2 Draft box

Open: examines the message.

New message: SMS or MMS.

Delete: delete the message.

Copy to SIM /phone: copy the message to SIM card or to phone.

Export SMS : export the message to phone or memory card.

Mark: after marking successfully, may delete all selected SMS/MMS and export the marked SMS.

SMS search: you can input text to find the SMS

View details: the information of the message (Type/Date/Time/To)

1.2.3 Out box

Resend: resend message.

New message: SMS or MMS.

Delete: delete the message.

Delete all: delete all messages.

Move to draft: move the message to draft.

SMS search: you can input text to find the SMS

View details: the information of the message (Type/Date/Time/To)

1.2.4 Sent box

When sending messages, the “Option” of single message content, including the below operation: open, New message, delete, mark, view details, and operate after marked all of them: unmark, unmark all, delete.

Open: examines the message

New message: SMS or MMS.

Delete: delete the message.

Copy to SIM: copy the message to SIM

Export SMS : export the message to phone or memory card.

Mark: after marking successfully, may delete all selected SMS/MMS and export the marked SMS.

SMS search: you can input text to find the SMS

View details: the information of the message (Type/Date/Time/To)

1.3 Template

There are 10 phrases in text template. Press the left soft key to enter “Options” menu, including the below operation: edit the existing template, use it to create SMS/MMS, add new text template, delete and delete all templates.

1.4 SMS search

you can input text to find the SMS of inbox or draft box or outbox or sent box, press the left soft key to enter the message option, each function same as sms

1.5 Voice mail

This will automatically direct incoming calls to the voice mail centre when you cannot accept a call so that the caller can leave a message on the voice mail system of service network. If a message is left, you can access the message by visiting the voice mail system.

Under pre-dialling interface, long press 1 key to enter the menu of voice mailbox.

Enter "Voice mail" submenu, can set two voice mail servers at most.

The network operators must support the "Voice mail" function for it to be available. You may have to apply for it before it will be activated. For details and the voice mailbox number, please contact your network operator.

1.6 Cell broadcast

Broadcast messages refer to public messages sent by your network operator. If you use the broadcast message service you can receive messages on all different subjects from your network operator such as: the weather, taxis, hospitals, etc. Please contact your network operator for available subjects.

When you enter the "Cell broadcast" submenu you will see four menu options: "Receive mode", "Read message", "Languages" and "Channel setting"

You can read current broadcast message through "Read message".

Select the "Channel setting", can Add broadcast channel and set channel title and channel ID; can select on/off operation to preparing broadcast channel, filtrate needless broadcast channel; can select "Edit" to reinstall current channel; can select "Delete" to delete broadcast channel of preparing.

Note: The network operators must support the "Cell broadcast" function for it to be available.

1.7 Setting

SMS settings

In the use of message function, you need to do before the corresponding Settings. Enter SMS settings submenu, can choose:

Service center No.: storage or modify information center number.

Validity period: set in network information service when trying to store information in the information centre; the length of time.

Message type: setting default message type.

Status report: On/Off.

Direct reply: On/Off.

Inbox location: choose your default messages stored address.

Backup sent msgs: choose your messages backup or not.

MMS settings

Press the left soft key enter into "Settings" submenu, can make the following settings:

Page settings: you can change the duration, picture resizing and text.

Send options:

Multimedia retrieval: you can choose Always automatic, Auto. In home, Manual or off.

Allow anon. msgs: allow the anonymous MMS or not.

Receive adverts: On/Off.

Status report: On/Off.

Deny report sending: On/Off.

Validity period: set in network information service when trying to store information in the information centre; the length of time.

Backup sent msgs.: choose your messages backup or not.

Cell broadcast settings

Need to network operators support.

Voice mail settings

Need to network operators support.

1.8 Memory status

Examines the cell phone SMS/MMS, the plot broadcast memory; SIM card message memory; phone memory space and MMS storage.

2. Phonebook

You may through this function information memory name, telephone number and so on.

The telephone number may save in yours handset or the SIM card. The handset may save 500 telephone directory records, the SIM card memory telephone number record because of its capacity, but is different.

In the main menu "Phonebook" enters the telephone directory menu: select phone or SIM card, press the left soft key to access "Options":

View: look over the current contact info.

Call: dial directly.

Send: send SMS/MMS to the current contact.

New: add new entry.

Delete: delete the current contact.

Mark: mark/ mark all.

Copy: copy to SIM1/ copy to SIM2/ copy to phone.

Move: move to SIM1/ move to SIM2/ move to phone.

Add to blacklist: add the current contact to blacklist.

Assign to group: add the current contact to groups.

vCard : Send vCard: by SMS/MMS/Bluetooth to send.

Import: import the vcard from phone/**memory card** to phonebook list.

Backup: backup the current contact to phone/**memory card**.

Additional searching settings : can search for contact

Memory details: show the details of memory capacity.

3. Call history

3.1 All calls

Enter “All calls” submenu, will show the message of missed calls, received calls and dialed calls.

select a record, view the all calls info, then press the left soft key to enter into “Options”, include operate as follows:

View: to look over the missed call info.

Call: to call up the current number.

Edit before call : can edit number before call

Send: to send SMS/MMS to the current number.

Save: to save the current number to phonebook.

Delete: to delete the current record.

Delete all: to delete all/SIM1/SIM2 calls

Call timer: press the left soft key “Select”, can look over call time record up to now.

Add to blacklist: add the current number to blacklist.

Call cost: press the left soft key “Select” to enter “Call cost” submenu, can look over call cost record up to now.
